

## How to use eSchool to access projects and homework

Stage 1 log in (your child has been given their log in details).

Tips: You must log in as the child **not** as a parent.

This is the homepage for your class. It will be updated by your class teacher and they may leave a message for the whole class here.

Stage 2 click on My Class - this is a link to show you how this works.

**Tips:** Remember to submit your homework. This tab is at the bottom of the page. This sends a message to your teacher that you have submitted your homework.

Your teacher will mark your homework and may write a comment back to you. You need to check in the projects or homework, it does not send an alert to you. You may write a comment to your teacher but only **after** submitting work.

Remember teachers will be marking work in a rolling program as they do in school, especially if they are still teaching in school and virtually. Please remember our expectations of the standard of work would be the same as in school. Parents are also welcome to mark the work with your child but please submit the work as then we can see you are working.

### Tips for parents

- Teachers may have chosen to hide some pages of a PowerPoint as often these are very repetitive.
- We are trying to give you as many ways as possible to hand in homework.
- There are usually 3 ways; hand in, upload or write on line.
- You may write in your homework book and when you are able you can hand this back to your teacher for feedback.
- If you write online there is a grey box that says write in here, remember to submit it.
- To upload your homework use Power Point or Word. This is like attaching a document to an email.

**NB: If your child's account becomes locked this may be because an incorrect password has been entered. Please contact the school office via [admin2325@welearn365.com](mailto:admin2325@welearn365.com) and we will advise a new password as soon as we can.**
